Dear Authorized Dealer,

Thank you for being an Air Lift Performance Authorized Dealer. We want to inform you of upcoming warranty changes to our 3H™, 3P™ and 3S™ Air Management/Control Systems (including international G-Thread systems). Effective **09/03/2021**, all Air Lift Performance 3 Air Management Systems, including 3S, 3P, 3H, and accessories, will have either a **2-Year Limited Warranty** or **4-Year Limited Warranty**, dependent on if the system is purchased alone or with a front and rear suspension kit, or four (4) Dominator Air Springs. Please see the details in the Warranty overview below. Consumer purchases dated before 09/03/2021 will retain their Limited Lifetime Warranty as will Dealer backorders that ship after this date.

Additionally on this date, all air compressors, including those that come in our Air Management kits, will have a **90-Day Warranty**.

We require all Authorized Dealers, both Direct and Indirect, to update all online product listings to reflect the new Warranty (outlined below) by 09/03/2021, if the product warranty is listed on the webpage. Alternatively, you may also direct the consumer to the Air Lift Performance warranty page, www.airliftperformance.com/support/warranty, for warranty details on all of our products, instead of listing out any Warranty specifics on your webpage.

If you have a wholesale program and sell to other businesses, please notify your wholesale accounts of the warranty change as it would be required they update the warranty information on their website product listings.

Additionally, we have made changes to the warranty process that will make the claim process more convenient and faster for you and your customers! Having the customer register their warranty at the time of purchase will expedite the process, should they need to make a warranty claim in the future. Register your Air Lift Performance products here: <https://www.airliftperformance.com/support/warranty-registration/>

Registering the warranty will be the first step in the claim process. Before filing a claim, please have a proof of purchase (required for all warranty claims) and complete all recommended troubleshooting on your product.

For assistance with warranty information or product troubleshooting, please contact our customer service team at 800-248-0892.

Please see **pages 2 & 3** for our product warranty overview.*
